LIVE FIRE SUPPRESSION VERIFICATION FORM

Fire Fighter I, Fire Fighter II, Fire Fighter I/II Certification

This Live Fire Suppression Verification Form, fully and accurately completed, shall be administered as part of the CFPC Certification process to indicate the Certification Candidate has met the Job Performance Requirements (JPRs) for the specified objectives for NFPA 1001, *Standard for Fire Fighter Professional Qualifications*. (Refer to reverse side of form for JPR listing).

(Please Print Legibly):

Last Name	First Name	MI
Name of Fire Department		
FFID Number _ _ _ _ - _ _ _ _ _	Your FFID consists of the <u>first (3) letters of your last name AND the last four (4) numbers of your Social Security Number.</u> Example: John Adams – SS # 000-00-5555. The new FFID# will be ADA-5555	

INSTRUCTIONS: Complete the appropriate section(s) below based on the Certification Candidate's intended level of training and certification. Complete both sections for Fire Fighter I/II certification.

Fire Fighter I

Objective #	Job Performance Requirement	Auditor's Initials	Date
JPR# 5.3.10	Interior Structural Fire Attack - SS# 5.3.10A, 5.3.10A.2, 5.3.10A.3		

Fire Fighter I Local Verification

The Certification Candidate must complete one or more of the following Live Fire Suppression Evolutions.

Objective #	Job Performance Requirement	Instructor Initials	Date
JPR# 5.3.7	Passenger Vehicle Fire Attack - SS# 5.3.7A		
JPR# 5.3.8	Exterior Class A Fire Attack - SS# 5.3.8A, 5.3.8B, 5.3.8C		
JPR# 5.3.16	Portable Fire Extinguisher Suppression - SS# 5.3.16B, 5.3.16C		
JPR# 5.3.19	Ground Cover Fire Attack - SS# 5.3.19A, 5.3.19B, 5.3.19C, 5.3.19D		

Fire Fighter II

Objective #	Job Performance Requirement	Auditor's Initials	Date
JPR# 6.3.2	Coordination of Interior Fire Attack - SS# 6.3.2A, 6.3.2B, 6.3.2C		

Fire Fighter II Local Verification

The Certification Candidate must complete one or more of the following Live Fire Suppression Evolutions.

Objective #	Job Performance Requirement	Instructor Initials	Date
JPR# 6.3.1	Ignitable Liquid Fire Extinguishment with Foam - SS# 6.3.1A, 6.3.1B		
JPR# 6.3.3	Flammable Gas Cylinder Fire Control - SS# 6.3.3C		

This form is NOT valid without the signature of the Department Fire Chief or Designee or Director of the Regional School or Agency.

Affirmation of Signers: This is to attest that the Certification Candidate named above has successfully completed all Job Performance Requirements (JPRs) for each respective Live Fire Suppression Evolution, during formal training conducted in accordance with NFPA 1403, *Live Fire Training Evolutions*, 2007 edition. (Refer to reverse side of form for JPR listing).

Department Fire Chief or Designee or Director of Regional Fire School or Agency

Print Name	Signature	Date
------------	-----------	------

Objective #	Fire Fighter I - Job Performance Requirements
5.3.10	Interior Structural Fire Attack Attack an interior structure fire operating as a member of a team, given an attack line, ladders when needed, personnel protective equipment, tools, and an assignment, so that team integrity is maintained, the attack line is deployed for advancement, ladders are correctly placed when used, access is gained in the fire area, effective water application practices are used, the fire is approached correctly, attack techniques facilitate suppression given the level of the fire, hidden fires are located and controlled, the correct body posture is maintained, hazards are recognized and managed, and the fire is brought under control.
5.3.7	Passenger Vehicle Fire Attack Attack a passenger vehicle fire operating as a member of a team, given personal protective equipment, attack line, and hands tools, so that hazards are avoided, leaking flammable liquids are identified and controlled, protection from flash fires is maintained, all vehicle compartments are overhauled, and the fire is extinguished.
5.3.8	Exterior Class A Fire Attack Extinguish fires in exterior Class A materials, given fires in stacked or piled and small unattached structures or storage containers that can be fought from the exterior, attack lines, hand tools and master stream devices, and an assignment, so that exposures are protected, the spread of fire is stopped, collapse hazards are avoided, water application is effective, the fire is extinguished, and signs of the origin area(s) and arson are preserved.
5.3.16	Portable Fire Extinguisher Suppression Extinguish incipient Class A, Class B, and Class C fires, given a selection of portable fire extinguishers, so that the correct extinguisher is chosen, the fire is completely extinguished, and correct extinguisher-handling techniques are followed.
5.3.19	Ground Cover Fire Attack Combat a ground cover fire operating as a member of a team, given protective clothing, SCBA if needed, hose lines, extinguishers or hand tools, and an assignment, so that threats to property are reported, threats to personal safety are recognized, retreat is quickly accomplished when warranted, and the assignment is completed.
Objective #	Fire Fighter II - Job Performance Requirements
6.3.2	Coordination of Interior Fire Attack - Various Levels Coordinate an interior attack line for a team's accomplishment of an assignment in a structure fire, given attack lines, personnel, personal protective equipment, and tools, so that crew integrity is established; attack techniques are selected for the given level of the fire (for example, attack, grade level, upper levels, or basement); attack techniques are communicated to the attack teams; constant team coordination is maintained; fire growth and development is continuously evaluated; search, rescue, and ventilation requirements are communicated or managed; hazards are reported to the attack teams; and incident command is apprised of changing conditions.
6.3.1	Ignitable Liquid Fire Extinguisher with Foam Extinguish an ignitable liquid fire, operating as a member of a team, team, given an assignment, an attack line, personal protective equipment, a foam proportioning device, a nozzle, foam concentrates, and a water supply, so that the correct type of foam concentrate is selected for the given fuel and conditions, a properly proportioned foam stream is applied to the surface of the fuel to create and maintain a foam blanket, fire is extinguished, re-ignition is prevented, team protection is maintained with a foam stream, and the hazard is faced until retreat to safe haven is reached.
6.3.3	Flammable Gas Cylinder Fire Control Control a flammable gas cylinder fire, operating as a member of a team, given an assignment, a cylinder outside a structure, an attack line, personal protective equipment, and tools, so that crew integrity is maintained, contents identified, safe havens are identified prior to advancing, open valves are closed, flames are not extinguished unless leaking gas is eliminated, the cylinder is cooled, cylinder integrity is evaluated, hazardous conditions are recognized and acted upon, and cylinder is faced during approach and retreat.
